PROJECTS

Create Post [🔗](#) | HTML, CSS, React Js, ReactRouter, Bootstrap

11 2025

- Developed a dynamic single-page web app for creating and managing posts, providing users a clean UI to add, update and view posts.
Used React.js for frontend, leveraging its component-based architecture and Virtual DOM to build a responsive and interactive UI. .
- [Live site here](#)

BattleShip [🔗](#) | HTML, CSS, React, Context API

11 2025

- React, JavaScript, HTML, CSS
Developed an interactive Battleship game using React with component-based architecture.
Implemented 10×10 grid logic, ship placement, rotation, and hit/miss detection.
Used React Context API for global state management (player turns, ships, hits).
Added random ship placement and game start functionality..
- [Live site here](#)

Shopping Cart [🔗](#) | HTML, CSS, React, React Router, GitHub Pages (Deployment)

- The project demonstrates my understanding of React component-based architecture, state management, and frontend development best practices. It also reflects my ability to build real-world applications with functional logic and user-focused design.
- Developed a responsive Shopping Cart web application using modern frontend technologies. The project focuses on providing a smooth user experience for browsing products and managing cart functionality.
